# Healing with Information

*The new homeopathy*

Maria Sági

Autumn/Winter 2015 - OBooks

*On the pages of this book the reader will find a vast range of new and prima facie surprising diagnostic and therapeutic methods. This writer can testify to their effectiveness. He had the good fortune of being treated by Dr. Sagi for the past twenty years with results that leave no doubt about the treatment's efficacy... This book is fundamental, almost encyclopedic reference for anyone who is seriously interested in new developments in the art and science of healing. **Ervin Laszlo***

A revolutionary development is under way today in the health sciences: the discovery

that information is basic to organic functioning. This means that correct information is basic to correct functioning – that is, to the maintenance or re-establishment of health.

It is a major contribution to contemporary medicine, harbinger of the coming era where information and energy will replace intervention and biochemistry as the best way to recover wholeness and health.

**Mária Sági** has developed an Information-Medicine technique pioneered by Viennese Erich Koerbler into an encompassing method for diagnosing and treating human health problems synthesizing the effect of information and the diagnosis according to the meridian system and has an active healing practice.
